€ 302,00 / 26%

DESCRIZIONE PRODOTTO:

The LD Stinger MON81AG2 is an especially compact active monitor with broad frequency response and a maximum sound-level pressure of 116dB for versatile use on stage.

The 8" coaxial speaker with an integral 1" HF driver attains a dispersion angle of 75°x75°, which is beneficial in multifaceted applications as a stage monitor. The coaxial configuration results in a very homogenous sound in the entire dispersion area plus very low susceptibility to feedback. The active monitor is driven by a Class AB power amplifier with an output power of 80W RMS; short-circuit protection and a limiter ensure dependable operation.

The signal is connected and looped through using an XLR/ jack combo socket and the XLR output. The rear connector panel is rounded out by a volume control, LED indicators, and the IEC power socket

The elegant bass-reflex housing made of 15mm multiplex is finished with a durable coating and has ergonomically milled handles and a metal grille to protect the speaker. The monitor angle is 35°.

Type: active

Woofers size: 8"

Woofers size: 203 mm

Woofers type: coaxial speaker

Woofers magnet: ferrite

Woofers brand: custom made

Speaker	1x8"
Frequency Range	90Hz-20kHz
